

## Consulting Services

Our employees are made up of highly skilled and experienced management consultants who have worked on many ERP projects across a large portfolio of clients and industries.

Since the company was established we have provided our clients with quality business and enterprise solutions, using technologies that enable our clients to react swiftly to their ever changing environments and achieve their business objectives.

Just as importantly, we believe Consulting is all about people. Our employment procedures ensure that we recruit high calibre individuals who have the skill and experience that our clients require.

## The Company Portfolio

We provide consulting services within the following areas:

### J.D. Edwards ERP Software

- Application Consulting
- Technical Consulting
- Bespoke Development & Support
- WorldSoftware to OneWorld Migration
- Change Management
- Architecture, Design and Configuration

### SAP ERP Software

- Application Consulting
- Technical Consulting
- Bespoke Development & Support
- Software Release Migration

- Hardware / Software Support and Maintenance
- Performance Tuning and Capacity Planning
- Data Migration

Although we are at the forefront of the industry and understand the latest developments such as Data Warehousing, Supply Chain Systems, e-Commerce, ERP Solutions, CRM and Front Office Systems, we do not allow the jargon to limit the creativity and the excellence of our solutions.

### Training Centre

We invest heavily in people and understand that the people within our client organisations are vital for the success of any project.

Cross fertilisation of skills and knowledge is a key factor in the solutions that we provide, ensuring that our clients can retain essential skills in-house.

Our experience in consulting has shown that business and technical solutions must be self sustaining. Education plays a key role in the future development and progress of any business and we can offer specific courses to address this:

### ERP Software

- Customised Training Workshops – Onsite and Offsite
  - Functional
  - Technical
  - Development

### Hardware and Software Courses

- iSeries 400 Enterprise
- Unix
- Oracle
- Microsoft SQL
- Microsoft Operating Systems

### People Development Skills

- Project Management
- Team Building
- Presentation Skills
- Change Management
